<b>Title:</b>	Article: Did a minimum case requirement improve resident surgical volume for closed wrist and forearm fracture treatment in orthopedic surgery?
<b>Date:</b>	July-August 2019
<b>Type:</b>	Article
<b>Author(s)/ Presenter(s):</b>	Mikhail A. Klimstra, Nicholas A. Beck, Mary L. Forte, Ann E. Van Heest
<b>Abstract (or Book Review):</b>	The purpose of this study is to determine whether the 2013 implementation of ACGME minimum case requirements was associated with increased documented case volume of closed manipulation of forearm and <a href="#">wrist fractures</a> (CMFWF) for graduating orthopedic surgery residents.
