Title:	Presentation: Opioid Settlement Funds: A Toolkit
Date:	March 23, 2024
Type:	Presentation
Author(s)/ Presenter(s):	Michele Maiers, Ryan Burdick, DC
Abstract (or Book Review):	Opioid settlement funding is being distributed across states, cities, and municipalities, and can be used to invest in improving patient access to nonpharmacologic therapies for pain, including direct investments in clinical care delivery, research, and public awareness campaigns. This workshop builds on the preceding keynote presentation, "Using Opioid Settlement Funding to Expand Access to Nonpharmacological Therapies". With the help of an online toolkit, attendees will apply resources and strategies aimed at generating grant applications, acquiring funding, and improving the collaboration between chiropractic academic institutions and the communities they serve.
